

Project Engineer

Seeking a mechanical engineer, with experience designing metallic components for the automotive industry. Mandarin and English required.

Location: Metro-Detroit, MI

Main Responsibilities

- Manages multiple part numbers during design and development phase.
- Checks CAD data and product drawings to verify all customer specifications and requirements being met and all changes documented.
- Participates in design review meetings and presents solutions to OE customers.
- Maintains all drawings and design-related documents.
- Tracks testing results and engineering changes.
- Reviews PPAP documentation against OE customer and industry requirements to ensure compliance.
- Acts as a technical liaison between American OE customers and Chinese suppliers.

Qualifications

- BS or MS in Mechanical Engineering.
- Excellent communication skills in both English and Mandarin
- At least 2 years of engineering experience, preferably in the design of metallic parts.
- Experience completing and/or reviewing PPAP packages preferred.
- Experience with a Tier 1 supplier in the auto industry is a plus.
